Your local hot water plumbers Same Day Hot Water provides hot water solutions in Queensland and Western Australia. The system only ignites when a hot water tap is opened. Once the hot water tap is closed, the system turns itself off. This eliminates the need for a standing pilot light or electricity. Saving energy with hot water on demand as a result. It is suitable for 1 bathroom homes and conveniently provides continuous hot water without a powerpoint or a standing pilot light. I had my 10h lpg installed by a licenced plumber nearly 11yrs ago. Will install another 10h or 13h sometime in the next year. Purchased in June 2009. Write a review on ProductReview.com.au ! Michael C. You waste a lot of water before it heats up then it fluctuates and doesnt hold heat, dont you dare use any other tap around the house for hot water it just isnt going to happen. Bosch makes other products that are beyond amazing but i think they should stay away from continous water systems. The only thing that I can say is that it is sitting outside my bin enjoying the sun and rust not much to say but shame on the person who designed this and went home and said what a machine i designed. this person is the devils cousin what a heap of rubbish stay clear you have been warned Purchased in June 2019. Could you kindly get in to. Read more uch with us at 1300 30 70 37 any time between 730AM to 6PM AEST on a week day, and we will endeavour to assist you with this issue. Te Manihera Perth, WA Bout month it has been like this published 1 year ago The unit is firing and gas is heating. But suddenly the past month my water is not Hot. I have just gone out and checked again ignition works fine gas is burning. By the time it gets to my taps I can hold my hand under it. I've turned everything up. But still warm to touch after running water hot for 4mins. Any one else have this. Purchased in April 2010. Please be advised that we usually recommend for our hot water units to be serviced at least every two years. Based on your details, it sounds like your unit may be due f. Read more or a service. As you are based in Perth, we suggest getting in touch with our authorised service agent, Perth Gas Centre, at 08 9378 1166. 1 like Report Te Manihera 1 year ago Oops you're probably right I will look into that ASAP thanks heaps 1 like Report Similar opinion. Write a review on ProductReview.com.au ! Billy Perth, WA 4 reviews 2 likes Have to then wait for stupid lock out or have cold shower. Can't wait to throw it in the tip and get something that works Purchased in September 2016. Were disappointed to hear that youve been having issues with your unit. Please be advised to check for any flow restrictors as we recommend usin. Another possible cause for inconsistent ignition could be a gas supply issue. For further assistance with troubleshooting, please dont hesitate to contact our team at 1300 30 70 37 tollfree any time from 730am to 6pm AEST. 1 like Report Similar opinion. Write a review on ProductReview.com.au ! Disappointed Melbourne Hot water only works for 20mins per day then nothing until the next day. Bosch honour your warranty and fix the unit. Like Report Similar opinion. Write a review on ProductReview.com.au ! Fixer 4 reviews 2 likes Thought it might have been the caused by the exposed hot water pipes and the distance from the heater to the bathroom. He was there for 15 minutes, took out the jets which were badly blocked, clean.

Read more ed them and voila steaming hot water.I had noticed I was not using much gas from my LPG gas cylinder now I know why, he said the other problem can be the water filter blocking up on the inlet pipe especially if you are not on mains supply, Hope this helps someone. Brett Melbourne The water goes from hot to cold constantly, when it is hot it is too hot and then

when you ease the cold up enough and the temperature is okay, it will last for about 10 seconds and then go cold. I have adjusted the water flow and gas flow plenty of times but as soon as the weather changes which happens in Melbourne all the time the water will be too hot or too cold so you have. Read more go adjust it again and that's just on the days when you can get it started. There was also a problem with it where you would turn the hot water on and then off and it was like a bomb going off down the side of the house. The only reason that I have kept this piece of garbage for so long is because we are a single income family and with a mountain of bills every week it makes it hard to replace a "working" unit, but when we have some spare money I can't wait to get a Rinnai and forget all about this lemon, I can't believe that Bosch are still selling these things. They won't be getting my money again!!! So if you're still reading my rant, do yourself a favor and don't buy one of these things. I have used the rinnai units a few times and they are great, 100 times better than my dud. Date Purchased Jun 2012 Like Share More Similar opinion. Write a review on ProductReview.com.au ! Wormy Mine didn't last 7 years when the hydro failed published 3 years ago If you are looking to install or fix a Bosch hot water system I recommend scrapping you unit and replacing it with a reliable brand. This cost a considerable amount of money. We would have been much better off to replace the unit as soon as it failed with a reliable brand. Date Purchased Jan 2012 Like Share More Similar opinion. Write a review on ProductReview.com.au ! grozzie MELBOURNE The distance from the gas meter to the Bosch unit is over 20 metres yet theres enough pressure to run a hot shower with the gas ducting heating in winter.

Service calls from the installer saw little improvement, and when winter hit things just got worse, with my elderly mother at times reduced to heating water in a kettle or on the stove to wash with, just like going back her prehotwater childhood. Finally in August the installers came and did a major internal overhaul of the system, and said that a design fault had been found and this should rectify it. Well the system did become more usable after this at least, but now having come by the house at Christmas I find big black carbon deposits have spewed out of the vents of the unit, up the bricks on the surrounding wall, and onto the eaves above. Who even knows what is wrong with the system to cause this, Ive never seen anything like it in a natural gas system. It may even be quite dangerous to

be using. So it will be another call out for the installers once they reopen after xmas, and we will undoubtedly be footing the bill for the clean up and repainting that the system has now caused. This system is an absolute mess and I struggle to see how its still on the market Bosch should hang their heads in shame for selling such a product. I know they will refuse, but I will be requesting a replacement system when I call out the installers again. If youre looking to buy theres plenty of other systems on the market that have to be much better dont let them talk you into one of these. Date Purchased Dec 2015 1 like Share More Similar opinion. Write a review on ProductReview.com.au ! Martinez 3 reviews 1 like If I turn on the cold water tap when running the hot, the heater unit cuts out and you only get cold water. Its been like that since day one. This is not like other Hot Water units Ive had. Buyer Beware. Date Purchased Jan 2013 Like Share More Similar opinion. Write a review on ProductReview.com.au ! hyphen22 Perth 3 reviews 1 like After 5 yrs some issues with pilot light starts.

We constantly had to try to clean it and brush any cobwebs away as spiders love the ignition box and pilot flint. Sometimes its frustrating to go in and out seeing what we could do. The pilot light was big issue. Had to light it with lighter every now then. Perth Gas Service has a monopoly to servicing the Bosch 10H in Perth area. Dont know if thats still the case but I dont recommend them as you have no other option. Overall after 5yrs you get issues and frustration. After 810 dont keep servicing. REPLACE. Date Purchased Aug 2006 Like Share More Similar opinion. Write a review on ProductReview.com.au ! ALEX B 2 reviews 1 like In the 1st two years of warranty, replaced ignition system, burner, heat exchanger and diaphragm. Works great in summer but when it feels like in winter. Diaphragm area is all plastic and leaks and cracks. It lasted 4 yrs. Got a 10P yes 10P. Absolutely robust built, all brass around the diaphragm and way too hot. Got the water flow half way set as fully in too hot to shower with even cold water opened. The 10H never even got that hot from brand new, even after the bosch tech looked at it 4 times during warranty. Date Purchased Oct 2016 Like Share More Similar opinion. I note in the current user manual fault options that the Hydro generator should be cleaned. The manual has no reference to this procedure. Can you give me instruction to carry this out. The click click of the starter process is not heard now. I have back flushed the unit which appears to be a temporary solution. I have had three service calls in the last 18 months which have cost me more than half the purchase cost of a new 10H. Your appointed technicians had spent most of the time on their mobile to your Bosch technical line. So please dont send me back to this process. Hope you can help. Nov 01, 2019 Best Fridges and Dishwashers in 2020. These large kitchen appliances are the backbone of your kitchen, meant to last you many years. The initial cost of a fridge or dishwasher is high, so to make sure youre not buying a lemon, here are the best fridges and best dishwashers of 2020.

ProductReview.com.au has affiliate partnerships. Installation should be pretty straightforward and the manuals not that in depth. There are however some sections on adjusting the gas and the like that you might want to read over. Login to post Now if needed clean over the whole unit with compressed air to spruce it up and reduce fire hazard or if your diy then its nice to clean things before working on them imo. Dont ask me what all that would cost. You dont need to mess round with the gas side thats all fine.

Now heres what you do to fix em, this is for a Bosch Hydropower 10H but I assume it probably applies to the other hydropower models too. Search GWH 715 ES manual.pdf Adding.pdf to search parameter helps locate manuals. Sell sheet with venting overview, technical and product specs Manual for ES high altitude, with installation, error codes and troubleshoot I cannot find a service manual, or service bulletins The suspect is probably gas supply, gas valve, or gas related part inside tankless unit. Before calling service technician, open following link for Bosch tankless troubleshooting resources, including Bosch contact information, typical manuals, error codes, tech support, parts, fuelsaver calculator, service bulletins, water heater forum, fixya links, disclaimers, and links for finding service technician. Read manual cover to cover, make sure tankless receives yearly maintenance as outline in manual. Add a comment with your experience so others with samesimilar problem can benefit. Also take advantage of fixya expert assistance live. For a price, expert works with you while you work on water heater or any doityourself project. Fixya is always less expensive than a service call. The gas is turned on. Just moved into this house so new to the machine with no manual. Comes up with. Read manual cover to cover, make sure tankless receives yearly maintenance as outline in manual. Add a comment with your experience so others with samesimilar problem can benefit. Also take advantage of fixya expert assistance live. For a price, expert works with you while you work on water heater or any doityourself project. Fixya is always less expensive than a service call. The unit suddenly has no spark. I have taken off the little generater cap and thouroughly cleaned it and the internal turbine. With no improvement. All. Installation should be pretty straightforward and the manuals not that in depth.

There are however some sections on adjusting the gas and the like that you might want to read over. What is going on Answer questions, earn points and help others. It is both compact and energy efficient, and cheap to install, without the need for a power point. These Bosch External HydroPower water heaters are an ideal replacement where there already exists an outdoor continuous flow unit. However, more and more people are using the Bosch External HydroPower to replace their traditional storage tanks. I suspect a rubber diaphragm may have a hole in it. Dismantling the lower housing surrounding the diaphragm and the several connecting pipes looks pretty tricky without some guidance. I dont need to dismantle the whole thing, just the lower section under the water flow adjustment knob. If I can get it apart and it is only a rubber diaphragm that needs replacing then I can do it. If its anything else it will mean a plumber and probably a whole new HWS which is fine but I want to try the simple DIY fix first.
